

Temaris PSC Area Extension

15 October 2026

➤ **Temaris PSC increased by 45%**

- New total area 1,770 km sq
- Ensures all resources benefit from same enhanced fiscal terms

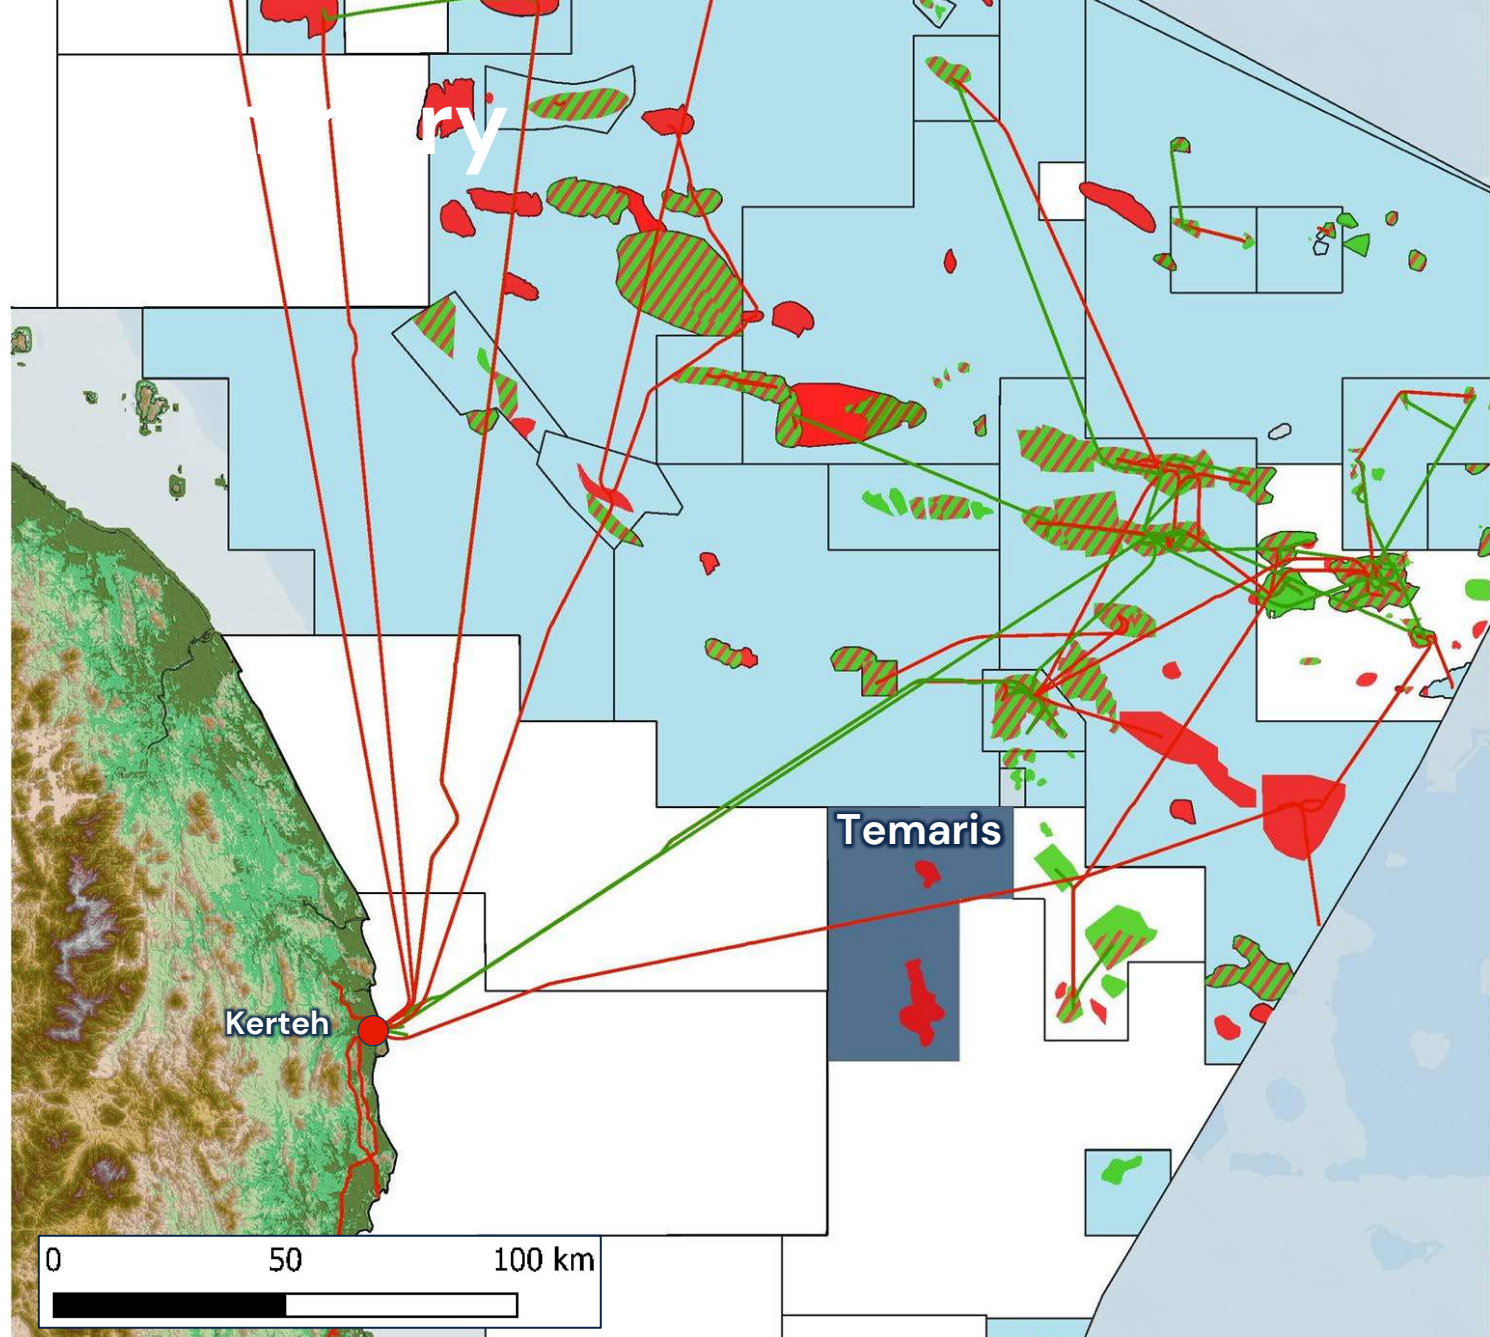

➤ **Potential to double existing mean Prospective Resources**

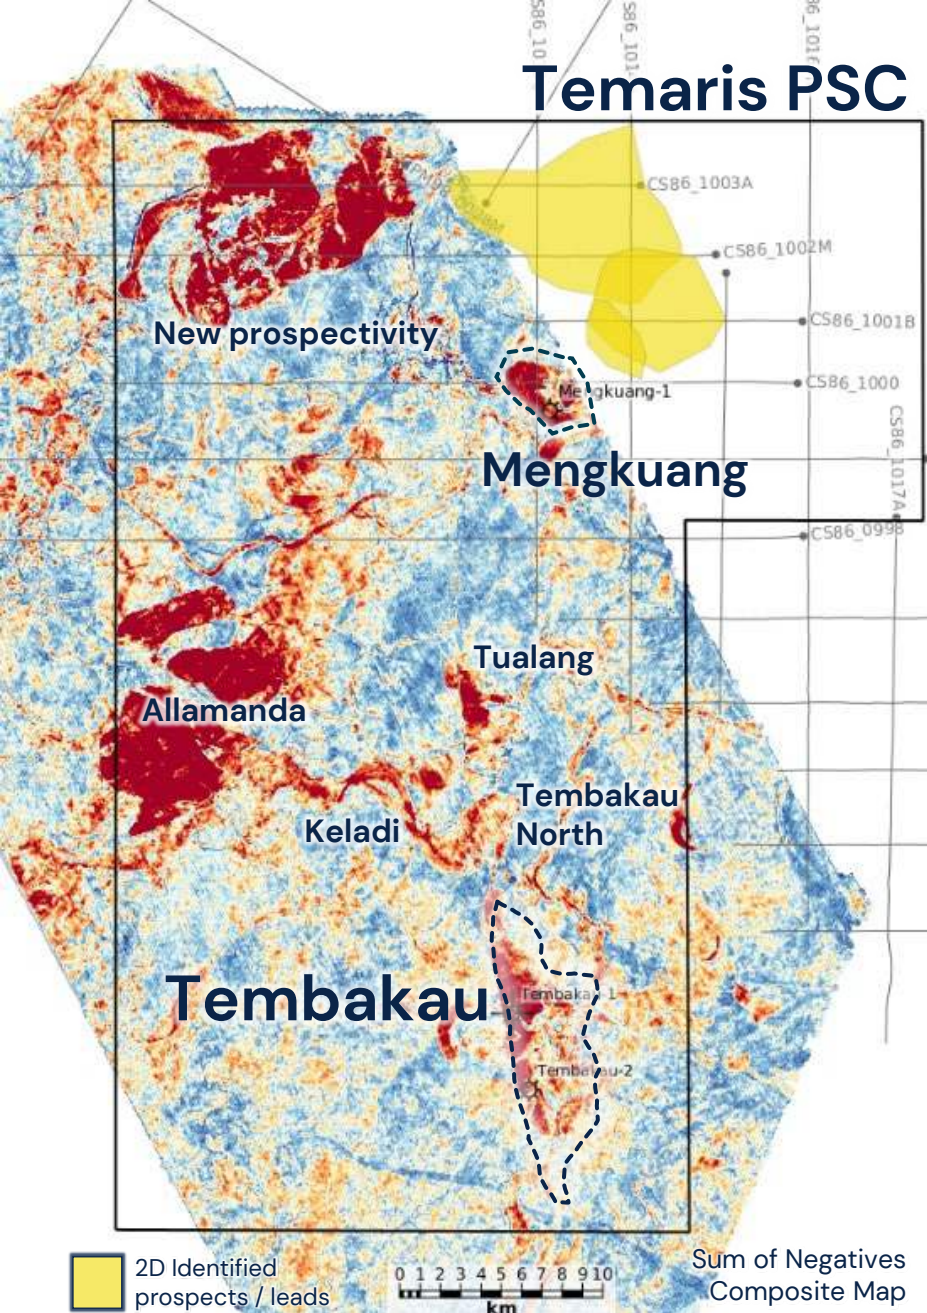

- Current CPR identified ~1 TCF on existing area, update underway

➤ **New 3D seismic being acquired late 2026 over the new area**

- PETRONAS-sponsored regional acquisition programme

➤ **Additional firm work commitment funded from existing cash resources**

Temaris Key Facts

- Ownership: **Seascope (100%)**
- Award: **Jun-25**
- Area Extension: **Jan-27**
- Size: **1,770 km²**
- Water depth: **~68m**
- Reservoir depth: **800-1400m**
- Hydrocarbon: **Gas (100%)**
- First gas: **H2 2028**
- Production: **100 mmscfd**

Temaris PSC Area Extension

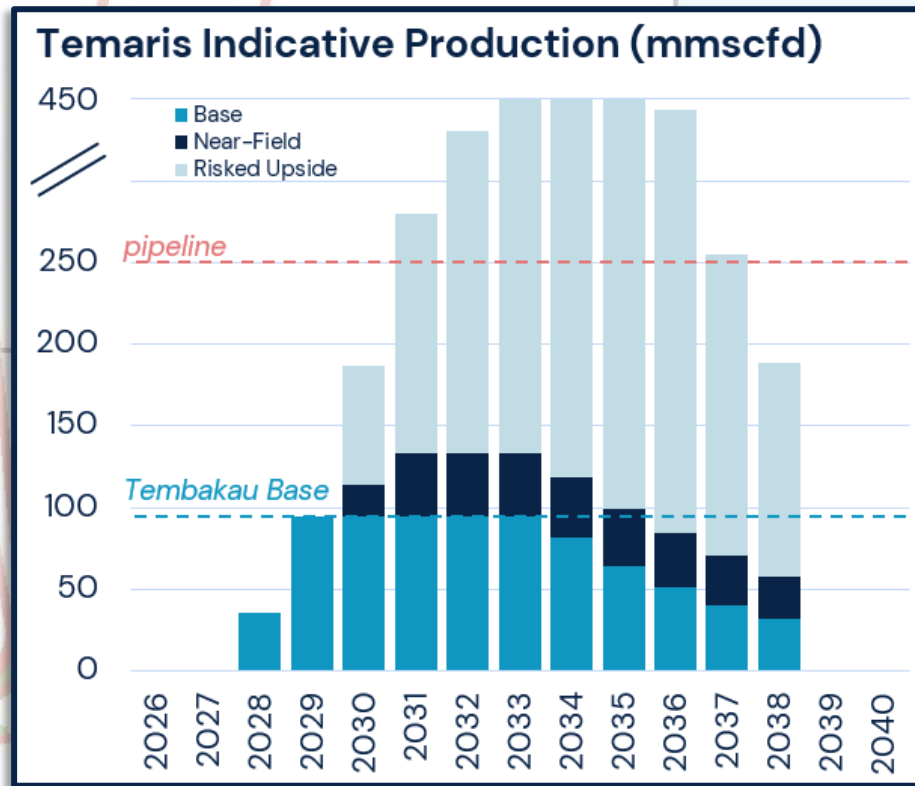

**Original
Temaris
PSC Area**

*2C Resources:
275 bcf*

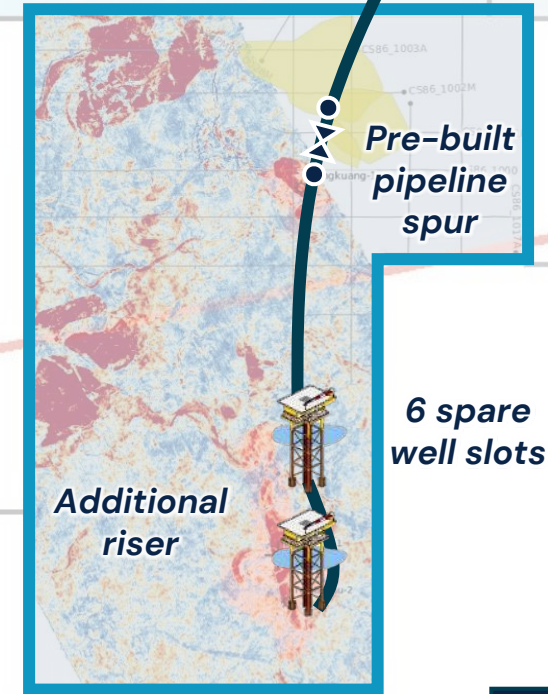

*Mean PR:
950 bcf**

- **Seismic reprocessing identified significant extension of proven Miocene channel system**
- **Strong seismic amplitude response when gas-charged**
 - Evident across enlarged Temaris PSC in multiple horizons
- **Extension enables Seascope to capture the entire play**
 - Rapidly monetise any incremental discoveries in the area.
- **Firm work commitment met through existing resources**
 - Process new 3D seismic
 - Contingent exploration well post-production start

Capture the play to rapidly monetise the upside

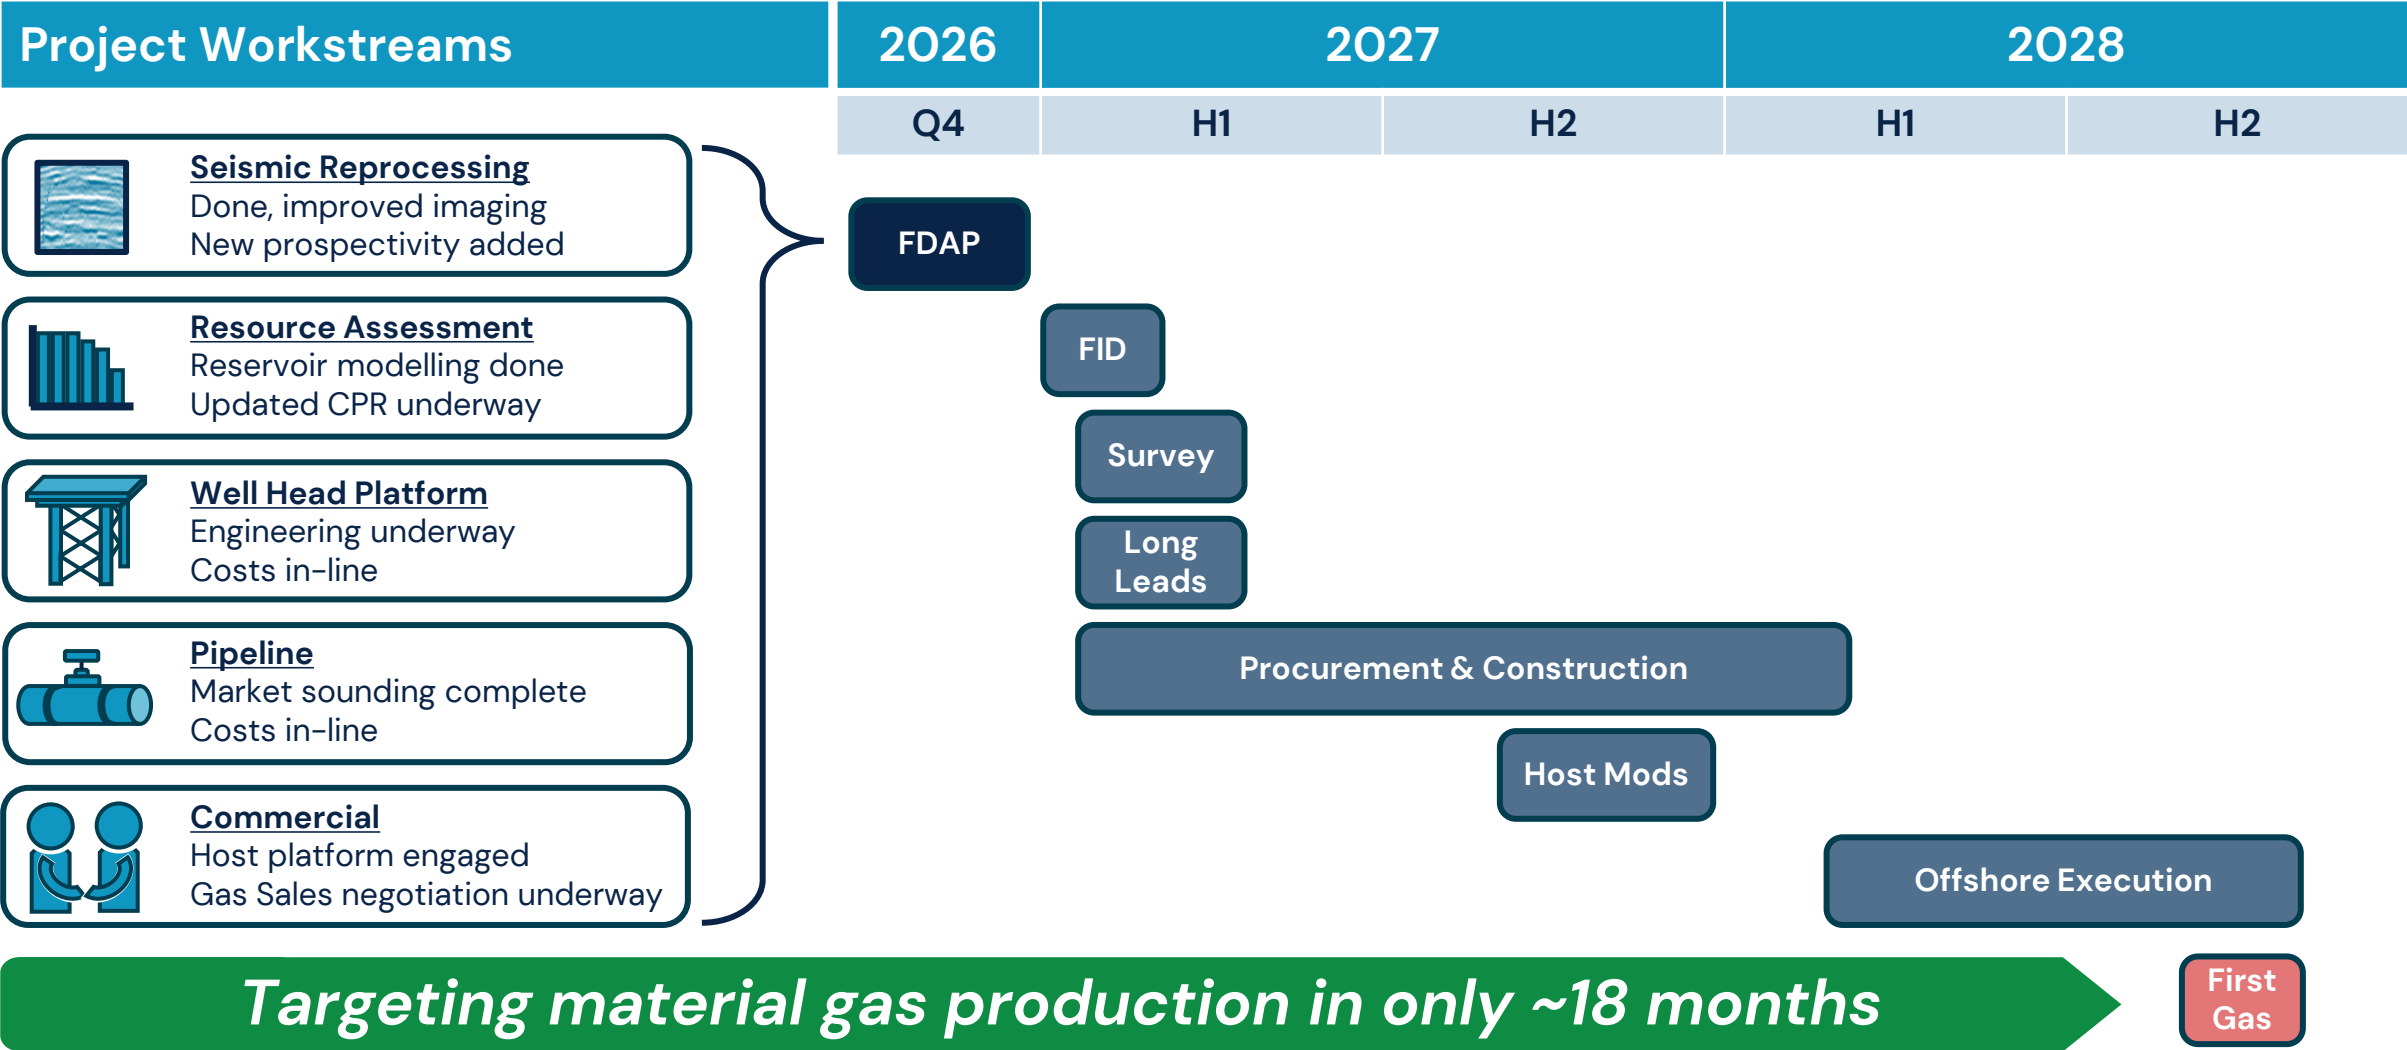

Temaris

25 km 50 km

Temaris delivering an execution-ready project by Q4

Capturing the entire play

Growing our footprint

- Temaris PSC area increased by 45%, large potential Prospective Resource uplift

Countdown to FDP submission

Execution ready project

- Field development plan submission imminent, deliver first gas in ~18 months

Farm-out underway

Uniquely positioned asset

- Strong industry interest in an execution-ready development with huge upside

Huge upside potential

Multi-TCF opportunities

- Kertang drilling now <12 months away giving exposure to multi-Tcf exploration upside
